ABOUT ME

UI/UX and product design student (B.Tech CS & AI, Minor in Design) who designs mobile products end-to-end in Figma, from user research to hi-fi prototypes, and can build in React. Kaggle Datasets Expert and Notebooks Expert (top 3% globally in both). Seeking product design internships at AI-first startups and tech companies.

EDUCATION

2024 – 2028

8.2/10 CGPA

Newton School of Technology, Rishihood University

B.Tech in Computer Science & Artificial Intelligence, Minor in Design

Focus areas: Artificial Intelligence and Human-Centred Design.

Coursework: UI/UX Design & Design Thinking, Human-Centred Design, Software Engineering, Agentic AI, Large Language Models (LLMs)

PROJECTS

NextFit – Fitness & Nutrition Tracker App | Figma, User Research, Prototyping **Behance** **Figma**

- Designed a 26-screen iOS app that brings calorie, macro, water, fasting and workout tracking into one simple experience
- Grounded the design in user research to reduce friction in daily logging, from a 4-step personalised onboarding to a focused home dashboard
- Built a consistent mobile design system and a 5-tab navigation (Home, Explore, Progress, Profile) with a central quick-add action

Verda – AI-Powered Plant Care Platform | Figma · User Research · Interaction Design **Behance** **Figma**

- Designed an AI-powered plant care experience that helps users diagnose plant health issues and act on personalised care recommendations
- Used user research to turn a complex diagnosis process into clear, approachable flows for plant owners
- Prototyped the end-to-end journey in Figma, from identifying a problem to following care guidance

ÉVORÉ – Luxury Jewellery E-commerce Website | Figma · Visual Design · User Research **Behance** **Figma**

- Designed a premium e-commerce experience for a luxury jewellery brand, using editorial storytelling and curated collections to highlight sculptural pieces
- Focused on refined typography, generous whitespace and clear visual hierarchy to match the brand's timeless, elegant positioning

EXPERIENCE

June - Aug 2026

6D Technologies

Software Development Engineer Intern **View here**

- Developed ML solutions for telecom anomaly detection, signal mismatch, mode flapping, and log intelligence.
- Built SMS Spam/Ham and A2P vs. P2P classification pipelines using TF-IDF and machine learning.

ACHIEVEMENTS & COMMUNITY

- **Kaggle:** Datasets Expert and Notebooks Expert, top 3% globally in both · https://www.kaggle.com/crystalbaby
- **Open source:** Contributor to NVIDIA/nvidia-kaggle, fixing bugs and expanding test coverage
- **HPAIR Asia Conference**: Selected Delegate for two consecutive editions (2025 & 2026) of Harvard's international student conference on technology, leadership, innovation and global affairs

SKILLS

- **Design:** Figma (Auto Layout, prototyping, design systems), Framer, FigJam, Adobe Express, Canva
- **Process:** User research, wireframing, usability testing, information architecture, interaction design, responsive design, accessibility
- **Technical:** React.js, HTML/CSS, JavaScript, Python, SQL, AI , ML and Deep Learning
